

Fingerstyle Guitar Lessons - How to play harmonics on the guitar
by Az Samad

3 Steps to Remember

1. Make sure your fretting finger is touching the guitar strings on the fret
2. Use your thumb (or other fingers if you'd like) to play the note
3. Lift up your fretting hand fingers to let the note sustain

The most popular natural harmonics are on the 12th, 7th and 5th fret.

For each of the frets you get different pitches.

Here's a table for your reference:

12 fret	1 octave higher than the open string
7th fret	1 octave and a perfect 5th higher than the open string
5th fret	2 octaves higher than the open string

[ACTION STEPS] How can you learn this better?

- 1) Make your own melodies using the harmonics
- 2) Write a song using just harmonics
